

Chlorophyll

Stock No. 1689-6 (946 mL)

Stock No. 1690-7 (60 capsules)

New! Preservative-free liquid formula Stock No. 1580-0 (473 mL)

There is a saying that goes “Green Inside, Clean Inside.”

Chlorophyll, the green matter in plants, is found abundantly in nature. Through the process of photosynthesis, chlorophyll harnesses the sun’s energy in order to perform various metabolic functions. When humans and other animals eat plant chlorophyll, they also benefit from this energy. Scientists have discovered that chlorophyll is molecularly very similar to the red pigment in the human blood cell. In fact, the only difference is that the human red pigment has a central atom of iron, while the plant green pigment (chlorophyll) has magnesium as the central atom. This discovery has led to the use of chlorophyll as a health-enhancing nutritional substance with many benefits.

Gentle, refreshing and full of goodness – make NSP’s Chlorophyll part of your daily nutritional program and experience the benefits of Nature’s Green Sunshine.

Did you know?

Chlorophyll has been called “Liquid Sunshine” because it absorbs energy from the sun. Out of a number of known plants, 260,000 are classified as higher plants, which means that they contain chlorophyll and perform a process called photosynthesis. In photosynthesis, plants utilize the energy provided by sunlight to manufacture carbohydrates from carbon dioxide and water. All the members of the higher plant group have the potential to offer health benefits. Only 10 percent,

however, have actually been studied for this purpose.

NSP Advantage

Liquid Chlorophyll Beverage

Two convenient formats: 946 mL economy size and new preservative-free formula, 473 mL.

For both products: A solution supplying 15 mg (per teaspoon—5 mL) of pure, water-soluble chlorophyllins derived from mulberry leaves, delicately flavoured with natural spearmint oil.

Recommendation: Adults and children take one teaspoon (5 ml) in a glass (250 mL) of water twice daily.

Ingredients: (946 mL): Purified water, sodium copper chlorophyllin, methylparaben, propylparaben, and spearmint oil.

(473 mL): Purified water, vegetable glycerin, sodium copper chlorophyllin, spearmint oil

Note: Preservative-free product must be refrigerated after opening.

Chlorophyll Capsules

For those who don’t like the taste of chlorophyll or spearmint, Chlorophyll is also available in a bottle of 60 softgel capsules. Each capsule contains 50 mg of sodium copper chlorophyllin complex in soybean oil. Other ingredients: gelatin capsule (gelatin, water, glycerin)

Recommendation: Adults and children take one or two capsules daily with a meal.

Features & Benefits

- An overall body tonic.
- Enhances digestion and promotes bile flow.
- A natural deodorizer that helps fight bad breath.
