

Nature's Gold, Level II

544 g, Bulk Powder, Stock No. 8004-9

Coeliac alert: This product contains gluten.

Good health is becoming a highly valued commodity in today's world. As the pace of life increases, and the quality and nutritional value of our food decreases, there is an epidemic increase in chronic and degenerative diseases. Balanced nutrition, with the delivery of much-needed nutrients at a cellular level, improves the condition of any disease state, and often eliminates all symptoms.

Nature's Gold is a simple way to incorporate super nutrition into a busy lifestyle. It is a natural, highly digestible, whole food product with bountiful nutrients.

Did you know?

Nature's Gold is a highly nutritious whole food produced from organic barley seed. Plant seeds are powerhouses of stored nutrients, in concentrations much higher than any other part of the plant. However, ungerminated seeds are very difficult to digest. Employing a unique method developed for Nature's Gold, the seeds are synchronized to germinate within minutes of each other, resulting in a completely uniform nutrient concentration. The sprouts are then naturally treated by a proprietary process to enormously enhance their nutritional value and keep the nutrient levels stable for months. The unique germination and nutrient stabilization processes of Nature's Gold make it up to 97% digestible. Regular barley that has not been treated with the Nature's Gold method has a digestibility of only about 5%.

Nature's Gold transports more amino acids, minerals, and vitamins into cells due to its enhanced digestibility.

Nature's Gold Level II is Ancient Grain Barley. Compared to Level I, it is darker in colour, has less seed hulls, is more dense and is packed with even higher levels of nutrients.

NSP Advantage

Easily digestible source of protein, vitamins and minerals.

Ingredients: Each tablespoon contains 9g organic barley.

Recommendation: Nature's Gold must be introduced to the diet slowly in order to avoid a sudden healing crisis. Follow the Level I program for at least 4 weeks before moving on to Level II. Follow the directions on the label carefully.

Special Note: Those with blood type O can start on Level II first, without going through Level I. In those cases, the dosing regimen for Level I should be observed when first starting on the product:

Week 1: 1/2 teaspoon per day

Week 2: 1 heaping teaspoon per day

Week 3: 2 heaping teaspoons per day

Week 4: 1 heaping tablespoon per day

Maintain: 2 heaping tablespoons per day

Risk Information: Do not use if you have celiac sprue disease or have an allergy to barley.

Caution: To preserve its nutrient value, do not heat above 35° C. Do not microwave, cook or bake Nature's Gold. This will cause deterioration of important enzymes.

Features & Benefits

- 97% digestible organic Super Food
- Nature's Gold provides 16 amino acids (building material of protein), 7 of which are essential, meaning they must come from the diet.
- Provides vitamins, minerals, and enzymes working in synergy, in nature's perfect balance, easily absorbable by the body.
- Provides simple plant sugars that are essential to the body's normal functions of cellular regeneration and repair.
- Provides soluble fiber, which lowers cholesterol and blood sugar levels.
- Helps with detoxification and elimination.
