

Zambroza

458 mL (15.5 oz), Liquid Antioxidant Tonic, Stock No. 4104-1

Nature's Sunshine has harvested the most healthful fruits and nutritional supplements from around the world and combined them into one delicious, nutritious juice: Zambroza.

Zambroza contains ingredients rich in bioflavonoids and antioxidants. Bioflavonoids enhance vitamin C absorption and help maintain collagen and capillary walls. They also aid in the body's defense system.

Antioxidants scavenge damaging free radicals and benefit virtually every organ and body system. Zambroza delivers a punch of antioxidant protection with a high ORAC (Oxygen Radical Absorbance Capacity) value (see graphs on next page).

Among Zambroza's key ingredients is mangosteen, a fruit found in the eastern tropical countries, such as Thailand. Mangosteen fruit and pericarp (peel) contain the greatest known supply of compounds called xanthones, which offer powerful immune and cardiovascular support.

Did you know?

Antioxidants are getting increasing attention from the scientific community. Promising studies have led US authorities to state, "Eating plenty of high-ORAC fruits and vegetables—such as spinach and blueberries—may help slow the processes associated with aging in both body and brain."

Xanthones have also attracted attention from

scientists and researchers who are discovering that these compounds support the immune, structural, and digestive systems, and the brain and the skin.

Zambroza is full of healthful xanthones, bioflavonoids and powerful antioxidants. Zambroza contains an extract of mangosteen fruit and pericarp, which contributes significantly to its high xanthone content.

NSP Advantage

NSP carefully researched ingredients high in antioxidant activity and selected only the best. In a study conducted by an independent laboratory, Zambroza clearly outperformed other leading competitors in ORAC capacity (a measure of a product's antioxidant strength).¹ The extract of mangosteen fruit and pericarp used in Zambroza significantly contributes to its high xanthone content.³

Another study showed that Zambroza is three times better in stimulating immune response than its closest competitor.²

Ingredients: Medicinal ingredients: Red and concord grape (*Vitis vinifera* and *Vitis labrusca*) fruit concentrate, blueberry (*Vaccinium corymbosum*) fruit concentrate, reconstituted mangosteen (*Garcinia mangostana*) fruit and pericarp extract, red raspberry (*Rubus idaeus*) fruit concentrate, red grape (*Vitis vinifera*) skin extract, wolfberry (*Lycium barbarum*) fruit extract, sea buckthorn (*Hippophae rhamnoides*) fruit extract, green tea (*Camellia sinensis*) leaves extract, red grape

Zambroza (continued)

458 mL (15.5 oz), Liquid Antioxidant Tonic, Stock No. 4104-1

(*Vitis vinifera*) seed extract, apple (*Malus domestica*) skin and fruit extract.

Non-medicinal ingredients: Purified water, sodium benzoate.

Recommendation: Take 15 mL (1/2 oz or one Tbsp) daily. A second 15 mL dose may be taken each day if desired.

1. Brunswick Laboratories; Wareham, MA

2. Monocyte/Macrophage Activation Assay conducted by David S. Pasco, Ph.D., University of Mississippi.

3. ChromaDex Analytics, Clearwater, FL

Features & Benefits

- Enhances the immune system and promotes overall health.
- Enhances and promotes energy.
- Has more than twice the antioxidant potential of its closest competitor.
